CONSENSIO GIN MENU

Hendricks Gin

A gin made from eleven different botanicals with infusions of rose & cucumber. This leads to Hendricks being a floral gin, perfect with tonic water or lemonade. Produced in Scotland this gin was launched in 1999.

Jèèvro Gin

A Savoie Gin which contains juniper, coriander, lemon thyme, lemon balm and angelica root. Each batch has its own flavours, evolving depending on the plants and spices available at the time of distillation.

Rock Rose Original Gin

Rock Rose gin is vibrant, complex and well-balanced. The fruity blaeberreries and rowan berries, floral Rhodiola rosea, and citrus and sweet notes combine with beautiful depth of flavour. Having taken on the advice of a local ranger and herbalist which resulted in the use of 5 local botanicals alongside imported botanicals such as Italian and Bulgarian juniper, Rock Rose Gin is a very appealing and characterful representation of northern Scotland.

C'est Nous Gin

Using 9 botanicals including Juniper, Angelica Root and Coriander macerated for several hours C'est Nous Gin is an aromatic and fragrant gin with hints of juniper, orange and coriander. Designed to be adaptable, C'est Nous Gin is great with tonic, in cocktails or simply on ice.

Williams Elegant 48 Gin

Elegant 48 Gin is made using rare varieties of apples from our 200-year-old orchards. In Ginny, our bespoke gin still, we add juniper, hops, elderflower, Bramley apple, angelica root, orange and lemon peels, plus secret wild botanicals from our meadow and fresh water from our spring.

Le Gin Du Mont Blanc

The only gin distilled and bottled in Haute Savoie, created using only solar energy and recycled materials, Le Gin Du Mont Blanc has the mission to "keep the mountain white". With flavours of juniper, bitter sweet orange and a pepper finish.
