

List of Cookies Featured on Website

1. Consensiochalets.co.uk (first-party / WordPress / WooCommerce / plugins)

- sbjs_current, sbjs_first, sbjs_session, sbjs_udata, sbjs_migrations, sbjs_current_add, sbjs_first_add → **Sourcebuster.js** (attribution tracking).
- tk_ai, tk_qs → **WooCommerce / Automattic** (usage stats).
- wfwaf-authcookie-* → **Wordfence** (security/auth for admin).
- woocommerce_cart_hash, woocommerce_items_in_cart → **WooCommerce** (cart state).
- wp_woocommerce_session_* → **WooCommerce** (customer session id).
- wordpress_logged_in_* → **WordPress** (user login state).
- wordpress_sec_* → **WordPress** (secure login/auth token).
- wordpress_test_cookie → **WordPress** (tests cookie capability).
- wp-settings-1, wp-settings-time-1 → **WordPress** (admin UI prefs).
- redux_current_tab, redux_current_tab_get, redux_current_tab_crocal_euf_options → **Redux Framework plugin** (theme/plugin settings state).
- datalayer_login_fired → **Site-specific / GTM** (marks login event fired).
- et-pb-recent-items-colors (I see the Redux line, but not this in your shots — may load on Divi sites, not necessarily here).
- PHPSESSID → **PHP** (session id for server, often used by Freshchat/other plugins).

2. Freshchat (third-party, chat widget)

- _cf_bm (domain: freshchat.com) → **Cloudflare bot management** for Freshchat.
- PHPSESSID (domain: chat.eue1.freshchat.com) → **Freshchat session** (keeps chat conversation persistent).

3. Google (third-party)

- NID, DV, 1P_JAR, AEC, OTZ → **Google Analytics / Ads** (preferences, stats, ad tracking).
- _ga, _ga_*, _gid → **Google Analytics** (user/session tracking).
- _gcl_au → **Google Ads** (conversion linking).
- AMP_* → **Google AMP** (unique visitor/session id).
- SEARCH_SAMESITE → **Google security** (SameSite enforcement).
- SOCS → **Google consent state**.
- SID, SIDCC, SSID, SAPISID, HSID, APISID, SAPISID → **Google account/auth/security**.
- SAPISID, SAPISID — variant naming depending on browser, I see them in screenshot 1.
- DV → short-term analytics preference cookie.

4. Facebook (third-party)

- c_user, xs, fr → **Facebook login & advertising tracking**.
- wd → **Facebook** (stores viewport dimensions).
- datr, sb, presence → **Facebook security & user state**.

5. Cloudflare (third-party, site protection)

- cf_clearance → **Cloudflare security** (proof of passing a bot/human check).
- _cf_bm → **Cloudflare bot management** (seen on freshchat.com and sometimes on first-party domains if proxied).
